Retrospective Development Factors

Attached is an exhibit showing Retrospective Development Factors.

RETROSPECTIVE DEVELOPMENT FACTORS *

Retrospective development factors for first, second and third adjustments are calculated
below. They are intended for application to retrospective plans with no loss limitation.

First Adjustment	RDF =	0.2535
Second Adjustment	RDF =	0.1302
Third Adjustment	RDF =	0.0837

For those companies using retrospective development factors with loss limitations,
the following formula may be used:

$$RDF(LIM) = (1.0 - ELF) \times RDF$$

RDF(LIM) = Retrospective Development Factors at limited basis
ELF = Excess Loss Factors for given Hazard Group and Loss Limitation
RDF = Retrospective Development Factors without Loss Limitation

For Example:

The $25,000 limit Hazard Group C ELF =   0.663

Then First Adjustment RDF =   (1 - 0.663) * 0.2535
                                          =   0.0854

* The use of retrospective development factors is optional.
