Graphs of Indemnity and Medical Loss Ratios

This exhibit consists of six graphs. Pages 10.1 and 10.2 show graphs of indemnity and medical loss ratios using loss development to paid-to-6<sup>th</sup>, paid-to-12<sup>th</sup>, and paid-to-20<sup>th</sup> as well as incurred and the average of the incurred and the paid-to-20<sup>th</sup> methods. Pages 10.3 and 10.4 are analogous to pages 10.1 and 10.2 but show indemnity and medical severity ratios respectively. These graphs provide a comparison of projected loss ratios for a range of methods.

Staff has also included pages 10.5 and 10.6, which show the trended loss ratios as well as their frequency and severity components. Please note that frequency, severity and loss ratio are all expressed on a normalized basis with policy year 1992 set equal to unity.
