Retrospective Development Factors

Attached is an exhibit showing Retrospective Development Factors.

## RETROSPECTIVE DEVELOPMENT FACTORS \*

Retrospective development factors for first, second and third adjustments are calculated below. They are intended for application to retrospective plans with no loss limitation.

First Adjustment	RDF =	0.3949
Second Adjustment	RDF =	0.2573
Third Adjustment	RDF =	0.1722

For those companies using retrospective development factors with loss limitations, the following formula may be used:

$$\text{RDF(LIM)} = (1.0 - \text{ELF}) \times \text{RDF}$$

RDF(LIM) = Retrospective Development Factors at limited basis  
ELF = Excess Loss Factors for given Hazard Group and Loss Limitation  
RDF = Retrospective Development Factors without Loss Limitation

For Example:

The \$25,000 limit Hazard Group C ELF = 0.682

$$\begin{aligned} \text{Then First Adjustment RDF} &= (1 - 0.682) \times 0.3949 \\ &= 0.1256 \end{aligned}$$

\* The use of retrospective development factors is optional.
