PENNSYLVANIA COMPENSATION RATING BUREAU

Table I – Summary of Financial Call Data

Table I presents premium and loss data which forms the basis for calculating development factors and projecting ratios of actual losses to expected losses by policy year. Losses are shown on a paid and case incurred (paid plus outstanding, excluding bulk and IBNR) basis split between indemnity and medical.

The data represents a summary of accumulated policy year experience as reported by carriers in the annual Financial Calls for Experience.

Two sets of development factors are shown measuring the development from December 31, 2014 to December 31, 2015 and also from December 31, 2015 to December 31, 2016. So as to maximize the use of available data, the companies used in one stage of development are allowed to be independent of those used in the other stage of development; therefore, the figures shown for the December 31, 2015 valuations may vary.

Experience for large deductible policies has been excluded from Table I. Losses attributable to catastrophe code 48 have been excluded.

Table I - Pages 1-6 - Reported Data

The data on Pages 1-6 represent the experience as reported by the carriers. Consequently, the 12/31/14, 12/31/15 and 12/31/16 valuations of losses reflect the impact of changes legislated by Act 44 and Act 57 and, more recently, HB 1846 of 2014.

Table I - Pages 7-31 - Adjustment to reflect Act 57 indemnity savings

In order for the loss development patterns suggested by the financial data to be usable, it is necessary that the indemnity payments and indemnity case reserves be put on a consistent basis with regard to benefit levels. As was done in last year's filing, all indemnity payments and reserves are adjusted to a post-Act 57 basis.

Pages 7-31 show the adjustments to bring indemnity losses to a post-Act 57 level for Calendar Years 1992 through 2016, respectively. A full discussion of the methods used to adjust the data was included in Exhibit 4 of the Pennsylvania April 1, 2000 filing.

Page 7 shows the adjustment to calendar year 1992. Successive pages (through Page 31) adjust later calendar year contributions to a post-Act 57 basis.

Table I - Pages 32-56 - Adjustment to reflect Act 44 and HB 1846 medical savings

In order for the loss development patterns suggested by the financial data to be usable, it is necessary that the medical payments and medical case reserves be put on a consistent basis with regard to benefit levels. As was done in last year's filing, all medical payments and reserves are adjusted to a post-Act 44 basis. In addition, all medical payments and reserves are also adjusted to a pre-HB 1846 basis.

Pages 32-56 show the adjustments to bring medical losses to a post-Act 44 level for Calendar Years 1992 through 2016, respectively. A full discussion of the methods used to adjust the data was included in Exhibit 4 of the Pennsylvania April 1, 1999 filing. Pages 55-56 also include adjustments to bring medical losses to a pre-HB 1846 level for Calendar Years 2015-2016. For year-end 2016, it is estimated that an average of two-thirds of reserves have been adjusted to a post-HB1846 level.

Page 32 shows the adjustment to calendar year 1992, the latest calendar year period unaffected by Act 44 and therefore the starting point in the derivation of a post-Act 44 and pre-HB 1846 Table I. Successive pages (through Page 56) adjust later calendar year contributions to a post-Act 44 and pre-HB 1846 basis.

Table I - Pages 57-62 - Adjusted to Post-Act 44 and 57 and Pre-HB 1846 levels

Pages 57-62 reflect the adjustment to medical costs to bring all data to a post-Act 44 and pre-HB 1846 level and the adjustment to indemnity costs to bring all data to a post-Act 57 level. This data was the basis for all subsequent loss development and trend analysis.
